

A geometric diagram showing a large circle with points A, B, C, D on its circumference. A smaller circle with center G is tangent to the large circle at point B . Points P, L, F, E, H, K, N, M are marked. Lines connect A to P , P to L , L to F , F to E , E to H , H to K , K to N , and N to M . There are also lines from B to G , G to C , and G to M . Two regions are shaded: the triangle PLB and the triangle KNB .

(Pollák Náthán.)

(Kohn Béla.)
